

## eBrandz Helps Wireless Emporium increases sales by 25 %

## eBrandz Appraisal:

"Traffic and sales have increased 25% since we started and we have attained #2 ranking for the main term in our industry which has been our long-term goal!

- Eugene Ku, from Wireless Emporium

**Client:** Established in 2001, Wireless Emporium, Inc. set out on a mission to provide consumers and on-the-go professionals a one-stop shop for cellular phone and wireless device accessories.

**Challenge:** After working with two US based SEO companies, Eugene Ku from Wireless Emporium realized that the engagements were extremely lengthy and expensive and the service levels did not justify the premiums they were paying. Also the shopping pages of the website did not have good content which was necessary for SEO. There was also no Sitemap which would have helped search engines properly access all internal pages.

**Solution:** eBrandz team started having discussions with Eugene and started adding content on shopping pages. Also a sitemap was created and placed on the site. A Google XML Sitemap feed was also created and submitted to Google. Then eBrandz team started working on all important product categories and worked on the HTML code to make it more SEO friendly.

**Results:** According to Eugene, the technical team from eBrandz has been very informative and responsive. Also as anticipated their natural rankings in search engines started to really increase after third and fourth month. Eugene answers "Traffic and sales have increased 25% since we started and we have attained #2 ranking for the main term in our industry which has been our long-term goal!

Eugene has already recommended eBrandz services to few other businesses.
